## Colour Analysis Training in a Box

### Audio CD contents

#### Introduction

The two-day course that we filmed produced a total running time of approx. 8hrs 39 mins. A bit much to take in all at once, we thought! So, we've split this down into **10x DVDs** for you of approx. 50 minutes each:

There are also **10x Audio CD disks**; the complete video soundtrack on audio CD so you can listen and learn in the car, away from home, or on holiday (if you really must!). I suggest you watch the DVDs first before you listen to the CDs. This is, after all, a visual business and you need to see the colours.

We have split the video content into 10 manageable, logical units. Each DVD video disk is accompanied by a dedicated section in the training manual which includes a transcript of everything that is discussed plus additional notes written after the filming to ensure you have absolutely everything you need to get started. Nothing has been left out!
